

Game Dev – Lab 1

Title: “Paint the Void”

- **Genre:** First-Person Exploration / Light Puzzle.
- **Core Loop:**
 - You spawn in a gray, empty 3D world (floating platforms, simple maze, or small arena).
 - With each step, your footprints leave trails of color that gradually “paint” the world.
 - Hidden glowing orbs appear — collecting them unlocks new colors/effects.
 - Avoid simple hazards (falling off, moving blocks) while trying to paint as much of the map as possible.
- **Discovery:** New sections of the map only reveal themselves when painted.
- **Expression:** Each player creates a unique “art trail” across the environment.
- **Challenge:** Survival element — the map shrinks or obstacles increase the longer you play.

Target Generation

Gen Z (1997–2012)

- Loves immersive but lightweight 3D first-person experiences.
- Familiar with Minecraft, Roblox, and indie walking sims.

MBTI Profile

- **Psychographics:** Enjoys self-expression, discovery, playful chaos, not rigid systems.
- **MBTI Type: ENFP ("The Campaigner")**
 - Extroverted → thrives in lively environments.
 - Intuitive → enjoys abstract, colorful, or surreal experiences.
 - Feeling → wants positive, fun vibes rather than cold realism.
 - Perceiving → prefers freedom over strict goals.

Player Motivations

1. **Discovery** – exploring a whimsical space.
2. **Expression** – interacting in ways that leave a visible mark.
3. **Challenge** – light puzzle-solving or timed survival.
